

Putting Land Rights on the Map

Cadasta develops and promotes the use of simple digital tools and technology to help partners efficiently document, analyze, store, and share critical land and resource rights information.

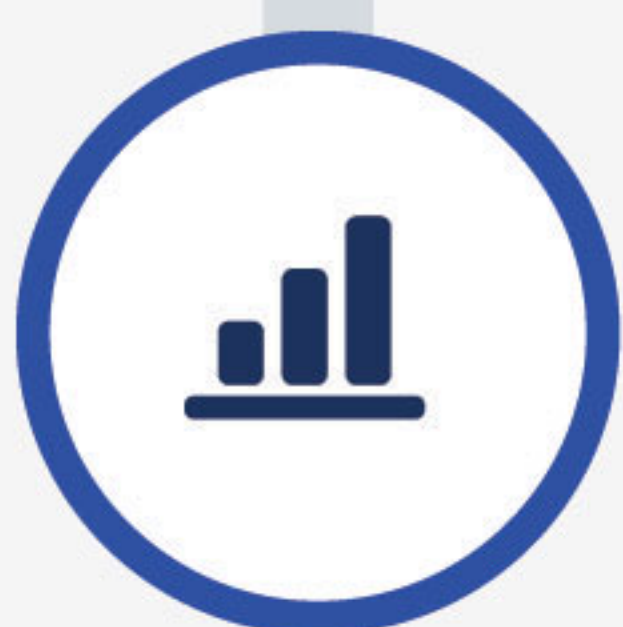

Customized Training & Tools

Receive customized training and tools to fit your project needs.

Collect

Use Cadasta's suite of tools to collect and upload satellite and drone imagery, GPS coordinates, interviews, paper documents, and more.

Analyze

Manage and analyze your data in the Cadasta Platform to identify project trends, priorities, opportunities, and challenges.

Share

Create and print reports to share your data with partners, stakeholders, and government ministries.

Secure

Store your data in a secure, cloud-based platform and determine who can view and edit your records.
