Cadasta takes data privacy and security very seriously. Please review Cadasta’s data privacy levels as they are shown here by geographic focus and level of information available.
Data Privacy Level Packet

The Cadasta Platform allows each Partner to securely store land and resource rights data, as well as associated information, and set privacy levels and permissions.

The Cadasta Platform also includes project webpages, a global web map, and a global metrics dashboard that are available to the public. The dashboard includes aggregated statistics, using anonymous data from all Cadasta projects to report the total number of people and households on the Cadasta Platform, including number of parcels, hectares, and other summary data. Together, Cadasta’s website and dashboard are important tools to promote partners’ work, share success stories, and demonstrate the impact of land and resource rights on vulnerable communities around the globe.

Cadasta takes data privacy and security very seriously. Partners control their data privacy levels to determine what types of data are displayed publicly on our website and Platform and which are kept private. Details of the specific information shared at each privacy level is summarized in the table below. Note that data on the global metrics dashboard will never include personal information that can identify any one person or household.
>> **LEVEL 1**: Your country-level view project will have a separate web page and will be displayed on Cadasta’s Global Metrics Map. Metrics from this project will be recorded and added to the Global Metrics Dashboard, but no identifiable information will be shown.

>> **LEVEL 2**: Your state- or province-level view project will have a separate web page and will be displayed on Cadasta’s Global Metrics Map. Metrics from this project will be recorded and added to the Global Metrics Dashboard, and a low level of identifiable information will be shown.

>> **LEVEL 3**: Your country- or district-level view project will have a separate web page and will be displayed on Cadasta’s Global Metrics Map. Metrics from this project will be recorded and added to the Global Metrics Dashboard, and a medium level of identifiable information will be shown.

>> **LEVEL 4**: Your community-level view project will have a separate web page and will be displayed on Cadasta’s Global Metrics Map. Metrics from this project will be recorded and added to the Global Metrics Dashboard, and a medium level of identifiable information will be shown.

>> **LEVEL 5**: Your parcel-level view project will have a separate web page and will be displayed on Cadasta’s Global Metrics Map. Metrics from this project will be recorded and added to the Global Metrics Dashboard, and a medium level of identifiable information will be shown.
Here are the details of what is shown at each level:

Summary of Data Shared at Each Privacy Level
(Description)

Level 1: Country View Privacy

With a selection of Level 1: Country View Privacy, Cadasta Foundation and Partner agree that the following will be ascribed to a particular project in the Project Web Page:

- Use case;
- Country name;
- Total hectares captured in the project’s data collection;
- Number of parcels, collected as either polygon or point geometry type, documented in the project’s data collection; and
- Average parcel size documented in the project’s data collection.

With a selection of Level 1: Country View Privacy, Cadasta Foundation and Partner agree that the following will not be ascribed to a particular project in the Project Web Page:

- Project name;
- Project description;
- Partner name;
- Partner contact information;
- Whether there is or is not active government engagement by the Partner on behalf of the project’s beneficiaries;
- Year and month of initial data collection;
- Month, day, and year of most recent update in data collection;
- Total number of households captured in the project’s data collection;
- Numbers of people in each household captured in the project’s data collection;
Gender and age distribution of people in each household captured in the project’s data collection;

Land documentation type;

Percentage of land ownership categorized by gender;

How land is held; and

Land use type.

**Level 2: State or Province View Privacy**

With a selection of Level 2: State or Province View Privacy, Cadasta Foundation and Partner agrees that the following will be ascribed to a particular project in the Project Web Page:

- Project name;
- Project description;
- Use case;
- Country name;
- Partner name;
- Whether there is or is not active government engagement by the Partner on behalf of the project’s beneficiaries;
- Total hectares captured in the project’s data collection;
- Total number of households captured in the project’s data collection;
- Numbers of people in each household captured in the project’s data collection;
- Gender and age distribution of people in each household captured in the project’s data collection;
- Number of parcels, collected as either polygon or point geometry type, documented in the project’s data collection;
- Land documentation type;
- Average parcel size documented in the project’s data collection;
- Percentage of land ownership categorized by gender;
● How land is held; and
● Land use type.

With a selection of Level 2: State or Province View Privacy, Cadasta Foundation and Partner agrees that the following will not be ascribed to a particular project in the Project Web Page:

● Partner contact information;
● Year and month of initial data collection; and
● Month, day, and year of the most recent update in data collection.

**Level 3: County or District View Privacy**

With a selection of Level 3: County or District View Privacy, Cadasta Foundation and Partner agree that the outline of the county or district where the project(s) is/are located will be shown in the Project Web Page. In addition, the following will be ascribed to a particular project in the Project Web Page:

● Project name;
● Project description;
● Use case;
● Country name;
● Partner name;
● Partner contact information;
● Whether there is or is not active government engagement by the Partner on behalf of the project’s beneficiaries;
● Total hectares captured in the project’s data collection;
● Year and month of initial data collection;
● Month, day, and year of the most recent update in data collection;
● Total number of households captured in the project’s data collection;
● Numbers of people in each household captured in the project’s data collection;
- Gender and age distribution of people in each household captured in the project’s data collection;
- Number of parcels, collected as either polygon or point geometry type, documented in the project’s data collection;
- Land documentation type;
- Average parcel size documented in the project’s data collection;
- Percentage of land ownership categorized by gender;
- How land is held; and
- Land use type.

**Level 4: Community View Privacy**

With a selection of Level 4: Community View Privacy, Cadasta Foundation and Partner agree that the outline of the community where the project(s) is/are located will be shown in the Project Web Page. In addition, the following will be ascribed to a particular project in the Project Web Page:

- Project name;
- Project description;
- Use case;
- Country name;
- Partner name;
- Partner contact information;
- Whether there is or is not active government engagement by the Partner on behalf of the project’s beneficiaries;
- Total hectares captured in the project’s data collection;
- Year and month of initial data collection;
- Month, day, and year of the most recent update in data collection;
- Total number of households captured in the project’s data collection;
- Numbers of people in each household captured in the project’s data collection;
● Gender and age distribution of people in each household captured in the project’s data collection;

● Number of parcels, collected as either polygon or point geometry type, documented in the project’s data collection;

● Land documentation type;

● Average parcel size documented in the project’s data collection;

● Percentage of land ownership categorized by gender;

● How land is held; and

● Land use type.

Level 5: Parcel View Privacy

With a selection of Level 5: Parcel View Privacy, Cadasta Foundation and Partner agree that the outline of the parcel where the project(s) is/are located will be shown in the Project Web Page. In addition, the following will be ascribed to a particular project in the Project Web Page:

● Project name;

● Project description;

● Use case;

● Country name;

● Partner name;

● Partner contact information;

● Whether there is or is not active government engagement by the Partner on behalf of the project’s beneficiaries;

● Total hectares captured in the project’s data collection;

● Year and month of initial data collection;

● Month, day, and year of the most recent update in data collection;

● Total number of households captured in the project’s data collection;

● Numbers of people in each household captured in the project’s data collection;
Data Privacy | Data Privacy Packet

- Gender and age distribution of people in each household captured in the project’s data collection;
- Number of parcels, collected as either polygon or point geometry type, documented in the project’s data collection;
- Land documentation type;
- Average parcel size documented in the project’s data collection;
- Percentage of land ownership categorized by gender;
- How land is held; and
- Land use type.

Definitions of Terms

The Global Metrics Dashboard Definitions of each summary data type are detailed below.

“Active Government Engagement” is categorized by yes or no and is defined as yes if the partner is working with a government, which could be various levels, on behalf of the project’s beneficiaries.

“Age Distribution” is categorized as successive age categories for all people in each household captured in the project’s data collection.

“Average Parcel Size” is defined by Documented In The Project’s Data Collection

“Country Name” is defined as the country location of the project.

“Documentation Type” is categorized as Unknown; Sales Receipt; Customary Title; Title/Deed; Certificate; Occupancy License; Other; or None.

“Gender” is categorized as female; male; and other and represents all people in each household captured in the project’s data collection.

“Geometry” is defined by no feature layer shown; the feature layer polygon of the entire country shown; a polygon which aggregates all polygons in the project shown; the duplication of polygons and or points from the survey feature layer shown.
“How Land is Held” is categorized as Customary; Informal Occupancy; Informal Customary Rights; Freehold; Leasehold; or State Land.

“Initial Data Collection” is displayed in year and month format and defined by the first day of data collection for a project.

“Land Use” is defined as Agriculture; Residential; Grazing; Fallow (unused land); Commercial/Industrial; Unimproved; Forest; Pastoral; Natural Resources; and or Fishery.

“Most Recent Update” is displayed in day, month, and year format and defined by the last day of data collection for a project.

“Numbers of People” is defined by the total members in each household captured in the project’s data collection.

“Number of Parcels” collected as either polygon or point geometry type, documented in the project’s data collection.

“Partner Name” is defined as the Partner in this agreement.

“Partner Contact Information” is defined as a Partner’s website url.

“Percentage of Land Ownership” is categorized by gender.

“Project Description” is defined as the summary of a partner’s project and is created by Cadasta Foundation staff.

“Project Name” is defined by the Partner in the Partnership Agreement.

“Total Hectares” defines the total area captured in the project’s data collection.

“Total Number of Households” is defined by all the households captured in the project’s data collection.

“Use Cases” are defined as Women’s Land Rights; Indigenous and Community Lands; Land Administration/Government; Informal Settlements; Agriculture and Agribusiness; Customary Lands; Urban; and or Conservation/Natural Resources.
