

# The Need ...

Millions of **people** live on land they cannot **prove** is theirs.

only

**35%**

Of global land is formally documented

over

**1.1 Billion**

people feel insecure about their land rights

When land rights are unclear:

- Families can be displaced
- Women lose economic power
- Conflict increases
- Climate & conservation efforts fail

Ā CADASTA

# The Problem...

Lack of Data and Access to Technology and Digital Skills Makes Communities Invisible and Vulnerable

- ★ Incomplete and **fragmented** data
- ★ Outdated or **inaccessible** technology
- ★ Data **not aligned** with government standards
- ★ **Lack of tools** and skills for secure data management
- ★ **Weak rights** and participation of women and youth

# Our Work ...

Cadasta **supports the people** securing land rights.

**Cadasta provides mapping technology, training, and support to:**

- Map and document land rights
- Empower women and marginalized groups
- Monitor and protect lands from loss
- Strengthen local governance and livelihoods
- Increase climate resilience

## **Cadasta Serves:**

**Frontline organizations** working in rural and Indigenous communities

**Local leaders and community groups** documenting their land

**Governments and ecosystem partners** strengthening land systems

CADASTA

# Cadasta Strengthens the Entire Land Rights Ecosystem.

Scalable support to partners  
across countries

Practical data solutions in  
complex settings

Measurable improvements  
in tenure security

Cross-sector returns — climate,  
gender, food security, governance

Improved community and  
government capacity

CADASTA

# What Changes?

# Everything.

Families stay on their land.

Women gain economic power.

Climate investments succeed.

Forests remain standing.

Conflict declines and communities feel more secure.

Secure Land Rights  
**Change Lives**

# Why you should choose Cadasta ...

## Trusted.

Builds relationships,  
improves transparency,  
ensures accountability,  
and safeguards data.

### Better

Improves data-driven decision-making

### Faster

Begin mapping in months not years

### Cheaper

Reduces time and costs of data  
collection and management

### Proven Results

100+ partners, 7K communities, 31  
million hectares of land, serving 7.2+  
million people with stronger land rights

# CADASTA

# Imagine a world...

By 2035

where **25 million people** have confidence to invest in their future,

where **35 million hectares** support climate resilience and economic opportunity,

where **30+ countries** are strengthening systems that recognize community land rights.

When land rights are visible,  
progress becomes fundable.
